PRESS KIT

Levegh is a Paris-based atelier crafting luxury One-of-One 1/8th scale model cars hand-built over 1,000 hours by master artisans.

LEVEGH
PARIS

Levegh is named after Pierre Levegh,
a hero of motorsport and a symbol of courage.

At Le Mans in 1955, his final act saved Fangio's life,
making him a symbol of sacrifice in racing history.

Our work honors that legacy through detail, soul,
and timeless design.

Levegh exist at the intersection of heritage,
craftsmanship and modern luxury.

Levegh creates ultra-precise, one-of-a-kind models of the most iconic racing and sports cars.

Each is a singular object, composed of 1,200+ parts built over 1,000 hours & authenticated by blockchain.

Our clients already own the real thing.
We build one they can live with, daily.

Our clients don't sleep in their garage,
but they can wake up to their dream car every day.

Levegh speaks to the child they were
and the collector they've become.

It is the only way to live
with the car that started it all.

Levegh offers two product lines:

- Ready-for-Collectors: from €20K
- Bespoke Commissions: up to €100K.

Each model is hand-painted, weathered, polished,
with parts in metal, plastic, carbon & even leather.

The result isn't a model
it's our client's dream car, scaled with soul.

Sole competitor builds industrially in China,
200 at a time. *Levegh* builds by hand, in France, once.

Their models are replicated and engineered,
Levegh's are handcrafted and alive.

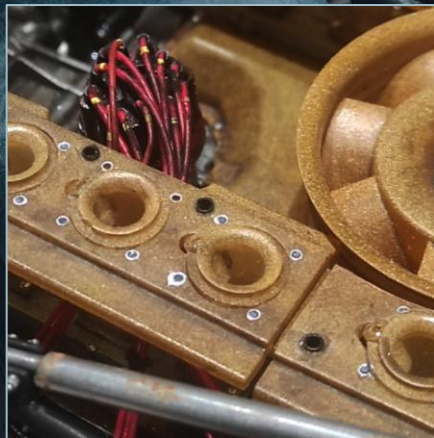

A *Levegh* model doesn't look like the real thing
it is the real thing, just scaled.
